

Six-Figure **Problogging** Secrets

This is the first of a series of short reports based on my study and understanding of an excellent book titled:

PROBLOGGER - *Secrets for Blogging Your Way to a Six-Figure Income*

The book, authored by two top class professional bloggers, Darren Rowse of Problogger.net and Chris Garrett of Chrisg.com, is an eye-opener and 'from the basics up' primer to what it takes to generate a six-figure income from blogging.

In this series of short reports I'll share some of what I've gathered from their experience, and I highly recommend that you [buy the book](#) (online at Amazon.com or at your neighbourhood bookstore) and DEVOUR IT line by line.

There's a wealth of wisdom jammed into 220 pages that you would take YEARS to accumulate by yourself.

TAKING IT FURTHER...

And in case you're looking for a more detailed step by step guide to becoming a 6-figure problogger, I recommend that you consider Yaro Starak's "[Blog Mastermind](http://EzineMarketingCenter.com/blogmastermind.htm)" coaching program that is currently accepting new students.

PROBLOGGER LESSON #1

It's All About Mindset

There are 2 critical requirements to succeed at ANYTHING.

#1 - You must believe it is possible.

#2 - You must be willing to do what it takes.

To win a gold medal at the Olympics, you must believe it can be done. And then, you've got to put in the hard work, disciplined training and sustained effort before you can stand on the podium as the world cheers.

And likewise for six-figure blogging.

That lesson is made explicitly clear in the very first chapter, where Darren and Chris both share their journey to the top - and more important, give you the very same mindset techniques you need to follow them there.

If I had a choice, I would make this one chapter **REQUIRED READING** for anyone - entrepreneurs, sportsmen, students, any kind of beginner who is embarking on a long, hard, arduous journey.

It will BOOST their chances of success SKY HIGH!

Far too many people start something with unreal expectations.

Six figure blogging is REAL. But you won't own a 6-figure blog by waking up one fine morning, deciding to do it, and then looking back a week or month later and feeling sad that your rosy dream has not yet come true!

Life doesn't work that way. Neither does six-figure blogging.

Darren and Chris talk about the elements of six-figure blogging, explain what it takes, the mental determination, the ability to go through crises of confidence, lack of motivation and declining enthusiasm to power through to the other side - and have a blog that generates a 6-figure income.

Darren tells the story of his *"Three Jobs"*, and how he went from *"Hobby Blogger"* to *"Part-Time Blogger"* and only then *"Full Time Blogger - Eventually"*

The lessons from his journey will help you get going too... and they are common sense lessons, really. Ones anyone who has succeeded through dedication and hard work can relate to and identify with.

- * 6 Figure Blogging takes time
- * Do it in little bits
- * Be disciplined
- * Dream - and follow through

While Chris Garrett's path to 6-figure blogging is not exactly the same, there are many similarities between his experience and Darren's, especially in the crucial and critical basics.

If you don't want (or can't) buy the **[PROBLOGGER book](#)** (it's just \$24.99 in the bookstore, you may get it even cheaper online), then at least pick it up from the shelf, and read the INTRODUCTION.

That alone will change your life in a significant way - and I'll bet after you read it, you'll want to take the book home to learn more!

COMING SOON...

In the next mini-report, I'll share some more insights from Darren and Chris' [**PROBLOGGER book**](#).

And in case you're looking for a more detailed step by step guide to becoming a 6-figure problogger, I urge you to take a look at Yaro Starak's [**"Blog Mastermind" coaching program**](#) that is currently accepting new students.
